PROFESSIONAL SUMMARY

Results-driven Software Engineer and 2025 graduate specializing in Java Full Stack Development. Proven expertise in engineering and deploying scalable web applications using Java, Spring Boot, and ReactJS. Adept at designing robust backend architectures, optimizing RESTful APIs, and managing ACID-compliant database operations. Experienced in the full Software Development Life Cycle (SDLC) within Agile environments. Committed to writing clean, maintainable code and solving complex technical challenges to enhance operational efficiency.

TECHNICAL SKILLS

- **Backend:** Core Java (8+), Multithreading, Exception Handling, JDBC, Servlets, JSP, Spring Boot, Hibernate.
- **Frontend:** ReactJS, HTML5, CSS3, JavaScript (ES6+), Bootstrap, Responsive UI Design.
- **Database & Architecture:** MySQL, Database Design, SQL Query Optimization, MVC Architecture.
- **Tools & DevOps:** Git/GitHub, Maven, Eclipse, VS Code, AWS (Cloud Practitioner Foundations).
- **Core Competencies:** Data Structures & Algorithms, RESTful API.

INTERNSHIPS

Java Full Stack Developer Intern

Kodnest, Bangalore

June 2025 – Feb 2026

- Engineered high-performance, MVC-based web applications utilizing Java, JDBC, Servlets, and MySQL, ensuring seamless database integration and session management.
- Standardized backend workflows by implementing robust RESTful APIs, improving system request handling and data retrieval efficiency.
- Collaborated in an Agile development team, adhering to strict coding standards and sprint deadlines while participating in peer code reviews.

AI – Machine Learning Intern

Rooman Ignite, Bangalore

Sep 2024 – Feb 2025

- Gained hands-on experience in training and evaluating machine learning and deep learning models, working with data preprocessing pipelines and model deployment strategies for real-world applications. Strengthened practical understanding of transformer architectures and their role in modern AI systems.

TECHNICAL PROJECTS

Deep Fake Detection Using Deep Learning | Python, OpenCV TensorFlow, JavaScript

- Designed a system to detect manipulation or face-swapped videos using CNN-based deep learning model.
- Used Python, OpenCV, and TensorFlow for frame extraction, preprocessing, and classification Identification facial inconsistency and motion irregularities for accurate detection UI for uploading and evaluating video files.

Farm2Market – Farm-to-Consumer Digital Platform | Tailwind C, Next.js, JWT Authentication Springboot, Restful API.

- Designed a secure, responsive UI using Next.js and Tailwind CSS for smooth browsing and ordering Integrated JWT-based Authentication and Buyer accounts.
- Built real-time product listings shopping cart, and order workflow for a seamless marketplace experience.

EDUCATION

City Engineering College

Bachelor of Engineering (Computer Science and Engineering)

2022 – 2025
CGPA: 7.77/10.0

SG Pu College, Bellary

Science (PCMB)

2019 – 2022
Percentage: 68%

Sasya Shyamala High School

SSLC

2019
Percentage: 71.28%

CERTIFICATIONS

- NLP – IBM
- SQL and SQL Server Beginners - Mind Luster
- Artificial Intelligence and Machine Learning – Mind Luster
