Professional Summary

Java Full Stack Developer with a strong foundation in computer science principles and experience in building end-to-end web applications. Proficient in Java, Spring Boot, RESTful APIs, HTML, CSS, JavaScript, React.js, and MySQL. Skilled in developing IDEAs for collaborative development and deployment. Passionate about delivering efficient, scalable, and user-friendly solutions through clean code and best practices in full-stack development.

Work Experience

AI - Machine Learning Engineer (Intern) – Rooman Technologies | Sep 2024 – Feb 2025 | Bengaluru, India
Gained hands-on experience in training and evaluating machine learning and deep learning models, working with data preprocessing pipelines and model deployment strategies for real-world applications. Strengthened practical understanding of transformer architectures and their role in modern AI systems

Skills

- **Programming languages:** Python, Java, SQL, HTML, CSS, JavaScript.
- **Database and Storage:** MySQL, PostgreSQL.
- **Libraries & Frameworks:** React.js, Spring Boot, RESTful APIs
- **DevOps & Tools:** VS Code, IntelliJ IDEA, Docker.

Projects

COLLEGE LIBRARY Management System

- Developed using Java (Spring Boot) and MySQL to manage books and member records.
- Implemented book issue/return tracking, due date calculation, and librarian authentication.
- Designed a responsive interface with HTML, CSS, and JavaScript.
- Automated manual processes, improving efficiency and reducing errors

Deep Fake Detection Using Deep Learning

- Designed a system to detect manipulated or face-swapped videos using CNN-based deep learning models.
- Used Python, OpenCV, and TensorFlow for frame extraction, preprocessing, and classification.
- Identified facial inconsistencies and motion irregularities for accurate detection.
- Developed a basic UI for uploading and evaluating video files.

Farm2Market – Farm-to-Consumer Digital Platform

- Designed and implemented a responsive UI using Next.js and Tailwind CSS for smooth browsing and ordering
- Integrated JWT-based authentication to secure farmer and buyer accounts.
- Built real-time product listings, shopping cart, and order workflows for a seamless marketplace experience.
- Connected frontend with a Spring Boot backend via REST APIs and managed data with MySQL.
- Supported CI/CD deployment using Vercel (frontend) and Google Cloud Platform (backend).

Education

- **City engineering college**, Bengaluru
Bachelor's degree in Computer science and Engineering | 2021-2025 | 7.89 CGPA
- **SetruGuru Shantappa College Of Commerce, Arts And Science**,
Bellary PUC in Science (Biology) | 2019-2021 | 68.5%
- **Sasya Shyamala Eng Med High School**, Kurugodu SSLC |
2018-2019 | 73.05%

Internships

- **AI - Machine Learning Engineer**
Rooman Technologies Private Limited, Bengaluru | Sep 2024 – Feb 2025
- **NLP**
Ipec Solutions Private Limited, Bengaluru | Sep 2022 – Oct 2022

Certifications

- Completed "**Artificial Intelligence and Machine Learning**" certification from Mind Luster, covering core ML algorithms and AI fundamentals.
- Completed "**SQL and SQL Server for Beginners**" from Mind Luster, learning query writing, data filtering, and basic relational database management.
- Completed "**HTML and CSS**" course from Mind Luster, building strong front-end layout and styling fundamentals.
- Completed "**Contextual Language Understanding with Transformer Models**"
Gained practical understanding of NLP fundamentals, contextual embeddings, and transformer-based language processing.
